JUNIOR BLOCKCHAIN DEVELOPER

+39 (392) 5653-844 | samuelefurnari9@gmail.com | samuelefrni | samuele-furnari-a37567220

## Personal Profile

My name is Samuele Furnari, and i recently completed the master in Blockchain Developer at Start2Impact University. Through the master i created several projects in the field of blockchain/web3, showing my practical skills. Some of this projects are showed in this CV, the others are available on my GitHub account. Despite my lack of work experience, i'am extremely motivated to undertake new challenges and get involved!

## Education

### Start2Impact University

Master in Blockchain Development

Feb 2023 - Jun 2024

### ITET Leonardo da Vinci

Graphic and Communication

Sep 2016 - Jul 2021

## Projects

### NFT Platform

Through the realization of this project i had the possibility to make in practice the skills learned during all the path of study. The name of the project is "Moove" and it about the realization of a decentralized platform for the purchase and management of the NFTs. By clicking to the title you will be redirected to the Github repository, where you can find a README file and a presentation of the project!

### Ethereum Advanced

Through the realization of this project i had the possibility to make in practice the skills about the off-chain oracles and the generation of random number through Chainlink VRF. The project is about the agency DnA, which would like to use the blockchain of Ethereum for the creation of exclusive content and guarantee its authenticity. By clicking to the title you will be redirected to the Github repository, where you can find a README file and a presentation of the project!

### DAO

Through the realization of this project i had the possibility to create a decentralized governance structure, structured in four smart contract. The project concerns the DnA agency, which believes that the community is fundamental to achieving its objectives: he therefore entrust me with the task to create a DAO. By clicking to the title you will be redirected to the Github repository, where you can find a README file and a presentation of the project!

### E-commerce dApp

Through the realization of this project i had the possibility to make in practice my skills about the field of front-end and about transaction on the Ethereum blockchain. The project concerns a client of name Gianni, he is interested to sell it's course through a e-commerce dApp, which the only payment methods is ERC-20 tokens. By clicking to the title you will be redirected to the Github repository, where you can find a README file and a presentation of the project!
